Recommendation Letter

To whom it may concern,

I am pleased to recommend **Elena Filatova**, who worked at **AL Tech Labs** as a **Frontend Developer** under my direct supervision from **February to June 2026**.

Elena actively participated in the full development cycle of web applications for an interior design project. Her responsibilities included:

- Participating in the development of UI/UX design and building a design system, which reduced the time needed for layout by 50%.
- Implementing application architecture according to the Feature-Sliced Design (FSD) methodology, ensuring modularity and scalability.
- Designing business logic, including the creation of components and managing their interactions.
- Contributing to the development of a content management service using the MERN (MongoDB, Express.js, React, Node.js) stack and Redux.
- Optimizing styles with SASS/SCSS preprocessors to improve the structure of CSS code.
- Ensuring mobile and cross-browser adaptability for correct display on various devices.

Elena consistently demonstrated strong technical skills, responsibility, and the ability to deliver tasks on time. She approaches problem-solving thoughtfully and actively participates in technical discussions and development processes.

Please feel free to contact me if further information is required.

Sincerely,

Alla Lebedeva

Founder & Lead Engineer
